CAREERHUB

UNLOCK THE POWER OF EDUVERSE+

Eduverse+ is ClassVR's enhanced content library that meets the evolving needs of students, and supports more advanced learning opportunities within the classroom. Curated in partnership with the world's leading VR content creators for education, Eduverse+ empowers you to:

- Unlock dynamic, immersive and AI-powered experiences
- Connect classroom learning with the real world
- Bring next level lesson engagement to your students

Four content suites open a vast range of new virtual reality experiences. Explore wildlife in stunning 360-degree videos, dive into STEAM with interactive 3D models, customise immersive learning with AI-powered content generation, and connect classroom learning with real-world career pathways.

WHY EDUVERSE+?

Personalised & Hands-On Learning

Easily customise VR content to align with your lesson plans and students' learning paths, helping them make connections between the classroom and the world beyond.

Curriculum-Aligned Resources

From STEAM to environmental science, each content package is designed to integrate seamlessly with your curriculum, making lesson planning easier while boosting student engagement and comprehension.

Proven Benefits of Immersive Learning

VR engages students at a deeper level, enhancing focus, retention, and understanding. With Eduverse+, you have a powerful tool to make learning memorable and impactful.

SUPPORTING YOUR LESSONS EVERY STEP OF THE WAY

Eduverse+ is designed to support teachers with curriculum-aligned resources and ready-to-use guides for each content package. Each package includes lesson sheets, activity guides, and teacher notes with clear objectives, discussion prompts, and follow-up activities. These resources simplify lesson planning and empower teachers to lead immersive, purposeful sessions that drive understanding and student engagement.

WHAT'S INSIDE EDUVERSE+?

EDUVERSEAI

Unleash Creativity with AI-Powered Content

EduverseAI allows educators to create fully customised 360° images with simple prompts. Whether you're exploring far-off planets, visualising historical events, or creating calming environments for social-emotional learning, EduverseAI is a fast, intuitive tool that helps bring any lesson to life. Designed for personalised learning, it empowers students to engage deeply and think critically as they explore customised VR images that support all areas of study.

WILDWORLD

Dive into Nature with 360° Wildlife Experiences

Explore the wonders of the natural world with WildWorld's collection of 360° wildlife videos and narrated films. Featuring more than 200 species across diverse ecosystems, WildWorld takes students on thrilling journeys into rainforests, oceans, savannas, and beyond. Each video, developed in collaboration with conservationists, is paired with curriculum-aligned notes to deepen understanding of animal adaptations, habitat needs, and the importance of biodiversity and conservation.

STEAM3D

Transform STEAM Lessons with Interactive 3D Models

Bring STEAM learning to life with over 1,100 interactive 3D models. From biology and physics to geography and art, STEAM3D allows students to explore intricate details by rotating, zooming, and isolating layers in models like human anatomy or molecular structures. Each model is carefully aligned with curriculum standards and includes detailed notes available in over 15 languages, providing valuable insights and supporting students in breaking down complex topics through active, visual engagement.

CAREERHUB

Connect Students with Real-World Career Exploration

CareerHub offers a bridge between classroom learning and future careers. With immersive 360° videos, students can experience a day in the life of professionals across industries such as healthcare, engineering, and logistics.

Each video offers insights into skills, daily responsibilities, and the tools used in each role, giving students a realistic perspective on career possibilities. Perfect for career days or as part of a future planning curriculum, CareerHub inspires students to think about their futures and empowers them to make informed decisions.
